

SPC-SDIO-1412CF

IO Module
1 CAN
Support CANopen
Working Voltage
8...32 V DC

Technical Parameter		Description																								
Housing		Plastic housing																								
Dimension (L×W×H)		133.3×116.4×36.2 mm																								
Installation		2pcs M5×20mm screws																								
Connector		42-Pin Tyco																								
Weight		0.25 kg																								
Working temperature		-40...85 °C																								
Protection class		IP67																								
Total number of I/O channels		26 channels (26 Inputs /12 Outputs)																								
Input		Up to 26 inputs can be configured

PI(AB): 1 quadrature coded input type can be matched; High/Low Configurable: means that the high and low valid types of the digital inputs are software configurable and the threshold voltage is software adjustable.																										
Output	Configurable up to 12 outputs
